

MARINE
buzz

All at sea without broadband?

The **NEW** HubbaX marine broadband unit gives ADSL equivalent broadband speeds up to 20 miles off shore using unique patented aerial technology.

Say goodbye to expensive satellite costs, add VoIP telephony and enjoy UK national calls of typically 1p per minute. Protect your craft by adding a camera surveillance service.

Utilising 3G networks via an integrated data SIM the unit creates a WiFi hotspot instantly and can also be wired via an Ethernet port, to connect multiple devices such as iPads and laptops.

Suitable for providing broadband on;

- survey vessels & work boats
- wind farm support vessels
- pleasure craft of all sizes
- inland waterways

Internal unit also available

Surveillance Camera Add-on	✓	✓

Essential 'add on' services to make the most of your connection.

voip

internet calls...anywhere

Need to stay in touch? Get an 01/02 landline equivalent phone for your boat, choose a number, add a handset to make and receive UK calls for typically 1p per minute.

eyespy

webcam...anywhere

Keep an eye on your boat with a surveillance package, with internal or external cameras the system will alert you to activity, allowing you to record and see what is going on via a web browser.

The internal Hubba and external HubbaX units bring ADSL speed broadband to boats with typical download speeds of 2Mbps and uploads of 1Mbps. They can provide connectivity for a range of devices, allowing you to download maps, check tide or weather conditions or update software on board. iPads and other wireless devices can all be connected via WiFi to keep you online.

For business the units can provide business class broadband, offering VPN capabilities, multiple phone connections and handling data, allowing you to work from your boat as if you were in the office. The unit can also be wired to provide large or commercial craft with connectivity for an onboard data or telephony network. Supplement your satellite system with a Hubba to benefit from cheaper connectivity with failover back to satellite when further from home.

At work or at play providing the connectivity you need. Going abroad on holiday, or broadband for your caravan, Buzz keep you connected wherever you go.

Feature rich telephony and broadband for businesses of all sizes. Modern, flexible solutions that adapt to your business needs.

Connectivity, telephony and camera surveillance solutions for commercial vessels, pleasure craft and inland waterways.

Bringing broadband to villages, entire communities, business parks and remote locations including farms and country estates.
